

IN THE SPECIFICATION

Please amend the paragraph beginning at line 12 of page 9 as follows:

--It is foreseen to sense the human motion by sensors that are remote from the human. For example, it may be possible in some situations to monitor respiration, and motion ~~be~~ by sound and motion sensors in a room and so the human would not have to wear the sensors. However, for the most reliable sensing and for mobility of the person, the sensors should be worn on the person's body.--
